Fluent (daily use)

## SUMMARY

10-year experienced web developer focused on performant web applications and scalable REST APIs. Strong in PHP/Laravel, WordPress, and modern JavaScript (React/Vue/Nuxt/Node). Remote-first: async communication, sprint planning/estimation, and clear documentation.

## EXPERIENCE

### Project Manager & Full-Stack Developer — 2024
Jobase

- Led cross-functional teams to develop and launch telehealth solutions, improving healthcare accessibility.
- Defined scope, timelines, and deliverables to align execution with business objectives.
- Managed stakeholder communication, requirements gathering, and progress reporting.
- Applied Agile/Scrum practices to improve delivery cadence and project execution.
- Designed, developed, and maintained scalable backend systems with a focus on performance and security.

### Full-Stack Web Developer — 2022 – 2024
Soocrin

- Collaborated with a team of developers to deliver multiple production projects.
- Developed and maintained web applications using Laravel, JavaScript, Node.js, React, Vue.js, Nuxt.js, and Express.js.
- Implemented and maintained REST APIs to improve data retrieval and user experience.
- Worked within Agile practices including daily stand-ups, sprint planning, and iterative delivery.

### Auto-entrepreneur — 2016 – 2021
Freelance

- Delivered websites using WordPress and Laravel tailored to unique client requirements.
- Focused on high-quality web solutions that balance functionality and aesthetics.

### Web Developer — 2015 – 2016
Polytechnique

- Designed and delivered multiple features to enhance user engagement.
- Implemented authentication and authorization for data security.
- Resolved bugs, executed system testing, and optimized performance of existing applications.

## ABOUT

Embraces challenges and treats problems as gateways. Ambitious, boundary-pushing, and focused on crafting top-notch user experiences with a long-term client satisfaction mindset.
